

## Connect to Exchange Using Android Devices

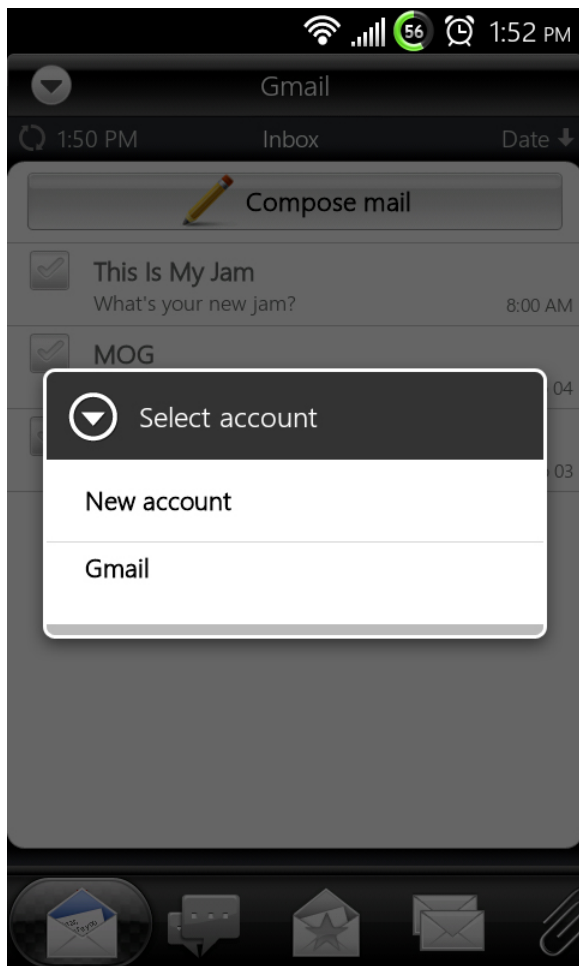

---

Open your Mail app from your Apps list or from the Accounts menu in your Settings.

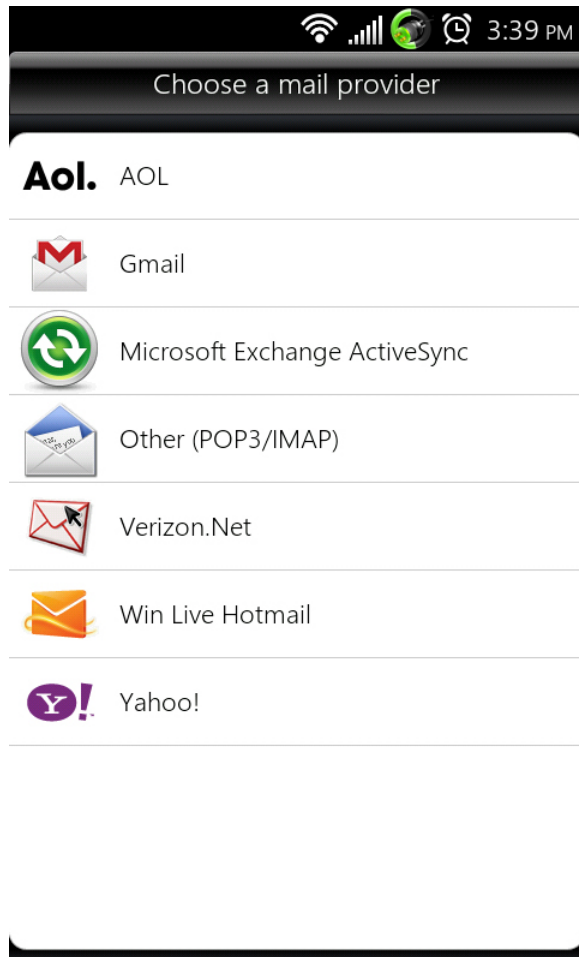

If this is your first email account then it will ask you start entering your information. If not, press the dropdown button to the top-left to open the Accounts list. (You can also press the Menu button and select "Accounts list" to do this)

Once you have the accounts list open select "New account".

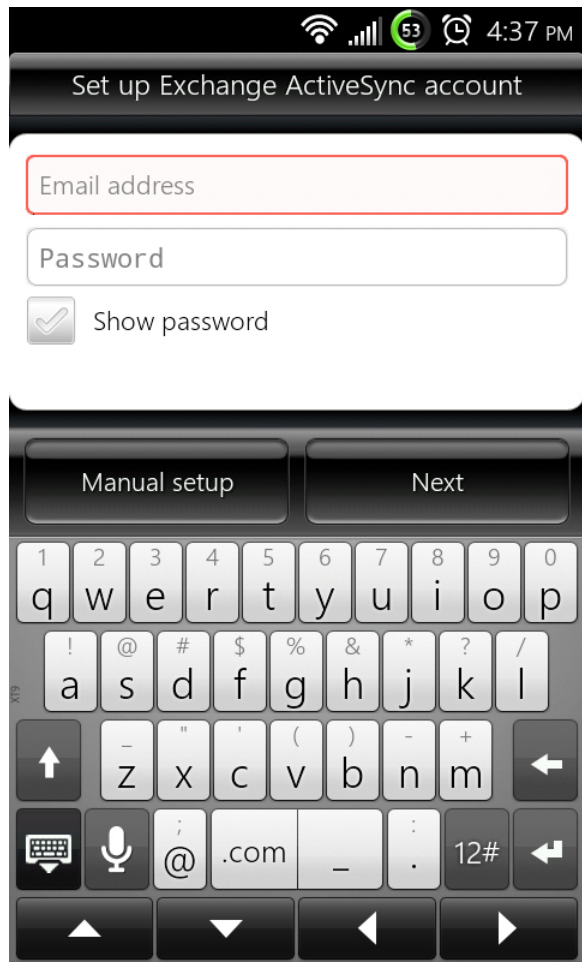

Select "Microsoft Exchange ActiveSync"

Enter you Exchange username and password.

Press Next.

Enter the following information:

- Email address: (your email)
- Server address: ns3.bigrigmail.com
- Domain: bigrigmail.com
- Username: (your username)
- Password: (your password)
- Make sure the box "This server requires an encrypted SSL connection" is checked

Press Next.

Set up Exchange ActiveSync account

Email address  
jeff@rvparkwebsitedesign.com

Server address  
ns3.bigrigmail.com

Domain  
bigrigmail.com

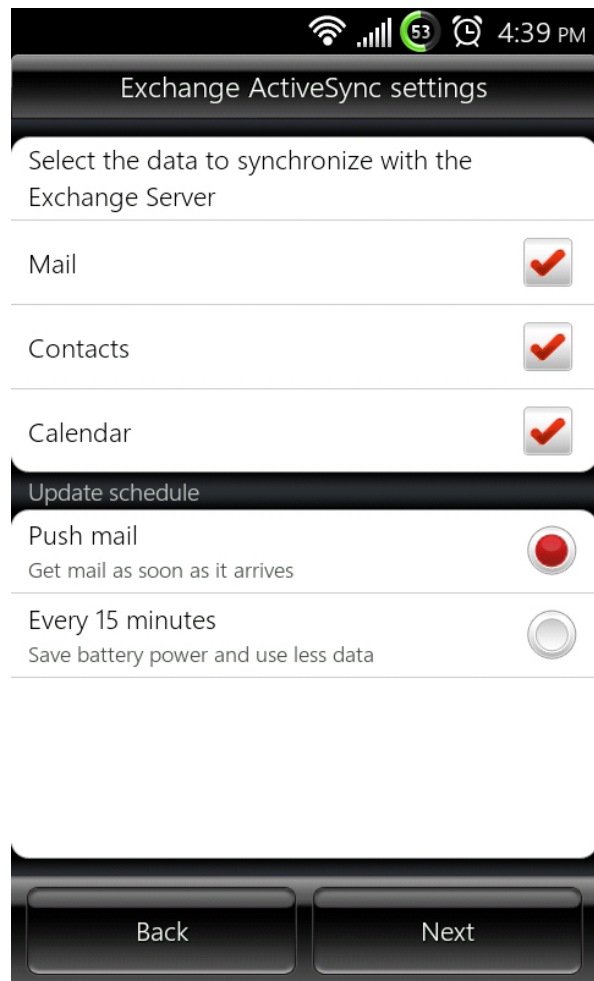

Username  
jeff@rvparkwebsitedesign.com

Password  
.....|

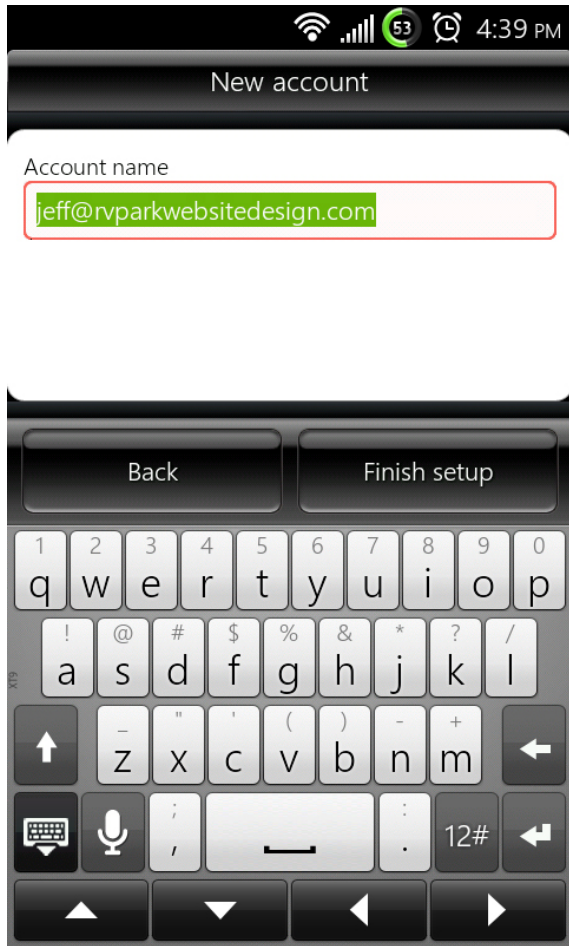

This server requires an encrypted SSL connection

Back Next

Check which data you want to synchronize and how you want your phone to be updated.

Name your account, you can just use your exchange username or email address.

You should now be at you inbox for your Exchange account through Big Rig Media.
